

AI Champions Phase 1 - Appendix Q10

Short bios and CV-style summaries for the core project team.

Sami Halawa Ribas - Project Lead and AI Architect

- Role in Phase 1: overall project leadership, clinical LLM design, hybrid integration, technical whitepaper authorship.
- Experience: 10+ years in AI/ML product development with previous B2B SaaS exits and domain-specific LLM implementation work.
- Relevant strengths: healthcare data pipeline engineering, privacy-aware AI architecture, product execution, and regulatory-conscious software delivery.
- Current fit for this grant: founder responsible for the UMBRAMED prototype and the proposed hybrid clinical LLM plus deterministic safety architecture.

Dr. Valerio Trigos Dominguez - Clinical Lead and Validation Director

- Role in Phase 1: clinical oversight, validation design, workflow supervision, and interpretation of retrospective prescription renewal cases.
- Clinical position: active Family Medicine specialist in the Andalusian Public Health System.
- Relevant experience: 10+ years of clinical practice, daily use of Diraya EHR, and management of a 6,500-patient panel.
- Academic and professional background: Licenciatura en Medicina, Universidad de Cadiz (2008-2014), with additional postgraduate emergency medicine training and scientific publication experience.
- Current fit for this grant: the project is grounded in his direct observation of the renewal workflow bottleneck that UMBRAMED addresses.

Team member	Contribution to grant	Availability
Sami Halawa Ribas	Technical lead, architecture, ML execution, reporting	60% FTE over 6 months
Dr. Valerio Trigos Dominguez	Clinical lead, validation supervision, domain expertise	30% FTE over 6 months
